

## Collaborators/Authors of Chapters in Edited Books

André HECK (Editor)  
Strasbourg Astronomical Observatory

(Updated : 2012.12.22)

The following table details books designed and published as editor-catalyzer, mostly on novel themes. See a separate list for the edited proceedings of meetings and conferences. The table hereafter is arranged alphabetically on authors with their affiliations at the time of their respective contributions, the volumes to which they contributed, the years of publication and the corresponding publishing companies. First authors appear in bold in the first column (and the last column is left blank). Other authors appear in normal font with a reference (last column) to the first author of the chapter. Books and publishers are decoded at the end of the document.
